Competitive Advantage

Competitor Game	What They Offer	What Is Missing	Ceylon Checkmate
1. Hunt Showdown	High tension survival and permanent death.	Lacks deep board game strategy elements. Requires upfront payment.	Shares the tension but adds chess battles. Free to play.
2. Sifu	Fast paced martial arts action and tough boss fights.	Strictly single player. Missing strategy board mechanics.	Shares fast combat and bosses. Adds multiplayer chess.
3. Naraka Bladepoint	Action packed multiplayer melee combat.	Pure reflexes without slow mental challenges.	Shares melee action but adds brain testing chess.
4. Chess Ultra	Highly realistic 3D chess simulation.	No physical action or combat outside the board.	Shares realistic 3D chess. Adds real time combat.
5. Escape from Tarkov	High stakes gameplay where you lose gear on death.	No puzzles or pure intellectual challenges.	Shares the high stakes fear. Adds a pay to continue option.
6. For Honor	Tactical multiplayer sword fighting.	Missing sudden death board game mechanics.	Shares melee combat but adds sudden death chess.
7. Dead by Daylight	Tension filled multiplayer survival.	No balanced one on one fights or deep mental strategy.	Shares survival tension but ensures balanced one on one fights.
8. Chess.com	The ultimate online chess matchmaking platform.	Only a 2D board game with no action combat or story lore.	Shares online matchmaking. Adds a 3D survival adventure.

GAMEPLAY

CoreMechanics : Sudden Death

Ceylon Checkmate features a brutal "Sudden Death" rule. The moment a player is checkmated in the chess duel, they are instantly eliminated from the round and kicked out of the fortress.

Chess Duel

Players face another online player in a realistic 3D Chess match.

Weapon Reward

The Chess winner receives a weapon connected to that region.

Action Combat

The winner enters the fortress and fights AI security bots using the earned weapon.

Collect

After defeating the security system, the player collects the Microchip.

Core Loop

CHESS → WEAPON → COMBAT → CHIP → NEXT REGION

Questions and Answers

Q: How does the game make money?
A: The game is free to play. We make money through cosmetic items and a pay to continue option when players die.

Q: What if a player is bad at chess?
A: We use a strict ELO ranking system. Beginners only play against other beginners. We also have AI bot coaches to help them learn.

Q: How long is a single match?
A: A full match takes about 15 to 20 minutes. It is fast and keeps players excited.

Q: Why use the same character for both players?
A: It saves development time and money. It also fits our story where the AI tricks you into fighting your own clone.

Q: What happens if you lose in a later region?
A: You lose all progress and restart from the beginning, unless you use the pay to continue option.

DEVELOPER

DarkPixel Studios

DarkPixel Studios is an ambitious indie game development team dedicated to breaking traditional genre boundaries.

Our goal with "Ceylon Checkmate" is to unite two completely different player bases: Strategy enthusiasts (Chess players) and Action gamers.

We believe the high stakes tension of permanent elimination will make this game a massive hit on streaming platforms like Twitch and YouTube.
